

FREEMAN

Sustained Forests

Sustainable Lumber for a Greener Future

Active forest management promotes forest growth, diversity, and quality.

Our program helps landowners boost the value of their forests, promoting the growth of healthy, sustainable forests with improved wildlife habitats and ecosystems.

Discover how we can help turn your forest into value:

- We buy softwood, studwood, and random-length logs.
- We buy standing timber.
- We buy land from private landowners.

Since 1832
